Learning Swift: Building Apps for OS X and iOS Paris Buttfield-Addison, Jon Manning, Tim Nugent

Get hands-on experience with Apple's Swift programming language by building real working apps. With this practical guide, skilled programmers with little or no knowledge of Apple development will learn how to code with Swift 2 by developing three complete, tightly linked versions of the Notes application for the OS X, iOS, and watchOS platforms.

In the process, you'll learn Swift's fundamentals, including its syntax and features, along with the basics of the Cocoa, CocoaTouch, and WatchKit frameworks. This book teaches you how to use common design patterns for Swift, how to structure an application for Apple's platforms, and how to submit working apps to the App Store.

Divided into four distinct parts, this book includes:

- **Swift 2 basics:** Learn Swift's features for object-oriented development, as well as various developer tools
- **OS X app development:** Set up your app, work with its documents, and build out its features
- **iOS app development:** Use multimedia, contacts, location, notifications, and iCloud files to build a fully featured iOS Notes app
- **Advanced app extensions:** Support Apple Watch and learn how to debug, monitor, and test all three of your Swift apps
