Michel Paradis, Hiroko Hagiwara, Nancy Hildebrandt

Neurolinguistic Aspects of the Japanese Writing System (Perspectives in Neurolinguistics, Neuropsychology, and Psycholinguistics) Michel Paradis, Hiroko Hagiwara, Nancy Hildebrandt

Neurolinguistic Aspects of the Japanese Writing System provides an account and an analysis of cases of dissociation between kana (syllabic) and kanji (ideographic) script in reading and/or writing.

Organized into five chapters, this book begins by discussing the aspects of the Japanese writing system relevant to neurolinguistic research. Experimental kanji/kana processing studies and clinical case reports are then presented. This book also explains the clinical dissociations in performance between aspects of the writing system.

This book will serve as a model for further studies in which a similarly detailed analysis is attempted of the neurolinguistic structure of other non-Western orthographies.
