Gold Nanoparticles for Physics, Chemistry and Biology

Catherine Louis, Olivier Pluchery

Gold Nanoparticles for Physics, Chemistry and Biology Catherine Louis, Olivier Pluchery

The fascination with gold is a story which spans millennia, however scientists have recently found a new interest for gold when it is divided into miniscule grains, such as gold nanoparticles. This scientific enthusiasm started in various fields of science in the middle of the 1980s and the present book offers a panorama of the major scientific achievements obtained with gold nanoparticles.

Various topics are reviewed such as: gold nanoparticle preparation methods, their plasmon resonance and thermo-optical properties, their catalytic properties, their use in biology and medicine as well as their possible toxicity and, finally, their future technological applications. The book also contains an in-depth study of the use of gold nanoparticles throughout the ages, starting from times where the concept of nanoparticles was beyond the realm of human imagination. All these topics are presented by world-class scientists within a set of self-contained chapters.

This book may be used as an advanced textbook by graduate students and scientists who need an introduction to gold nanoparticles. It is also suitable for experts in the related areas of chemistry, biology, material science, optics and physics, who are interested in broadening their knowledge and who wish to have an overview of the subject. Each chapter gradually leads the reader from the basics of a topic towards some of the current scientific challenges in the area. The necessary background material to achieve a solid understanding of each topic and the scientific literature to go further in the field is provided.

Contents:

- Gold Nanoparticles for Physics, Chemistry and Biology
- Gold Nanoparticles in the Past: Before the Nanotechnology Era (*Catherine Louis*)
- Introduction to the Physical and Chemical Properties of Gold (*Geoffrey C Bond*)
- Optical Properties of Gold Nanoparticles (*Olivier Pluchery*)
- Photothermal Properties of Gold Nanoparticles (*Bruno Palpant*)
- Synthesis of Gold Nanoparticles in Liquid Phase (*Daeha Seo and Hyunjoon Song*)
- Chemical Preparation of Gold Nanoparticles on Surfaces (*Catherine Louis*)
- Catalytic Properties of Gold Nanoparticles (*Geoffrey C Bond*)
- Surface Structures of Gold Nanoparticles (*Shamil Shaikhutdinov*)
- Theoretical Studies of Gold Nanoclusters in Various Chemical Environments: When the Size Matters (*Hannu Häkkinen*)
- Optical and Thermal Properties of Gold Nanoparticles for Biology and Medicine (*Romain Quidant*)
- Gold Nanoparticles for Sensors and Drug Delivery (*Christian Villiers*)
- What About Toxicity and Ecotoxicity of Gold Nanoparticles? (*Marie Carrière*)
- Technological Applications of Gold Nanoparticles (*Michael Cortie*)

Readership: Graduate students, young scientists and experts in related areas of chemistry, biology, material science and physics who need an introduction to gold nanoparticles.

From reader reviews:

Brandon Harmon:

Do you have favorite book? If you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each publication has different aim or perhaps goal; it means that e-book has different type. Some people feel enjoy to spend their time and energy to read a book. They are really reading whatever they get because their hobby will be reading a book. Think about the person who don't like looking at a book? Sometime, man or woman feel need book when they found difficult problem or maybe exercise. Well, probably you will require this Gold Nanoparticles for Physics, Chemistry and Biology.

Joseph McNeal:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge even the information inside the book that will improve your knowledge and information. The information you get based on what kind of publication you read, if you want attract knowledge just go with schooling books but if you want really feel happy read one having theme for entertaining such as comic or novel. The actual Gold Nanoparticles for Physics, Chemistry and Biology is kind of reserve which is giving the reader unpredictable experience.

Lavone Anderson:

On this era which is the greater person or who has ability in doing something more are more important than other. Do you want to become certainly one of it? It is just simple method to have that. What you need to do is just spending your time not very much but quite enough to possess a look at some books. Among the books in the top collection in your reading list is usually Gold Nanoparticles for Physics, Chemistry and Biology. This book that is qualified as The Hungry Slopes can get you closer in growing to be precious person. By looking right up and review this reserve you can get many advantages.

Marilyn Calhoun:

Do you like reading a publication? Confuse to looking for your preferred book? Or your book ended up being rare? Why so many issue for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but in addition novel and Gold Nanoparticles for Physics, Chemistry and Biology as well as others sources were given knowledge for you. After you know how the fantastic a book, you feel wish to read more and more. Science book was created for teacher or maybe students especially. Those books are helping them to add their knowledge. In different case, beside science e-book, any other book likes Gold Nanoparticles for Physics, Chemistry and Biology to make your spare time a lot more colorful. Many types of book like this.
