Manual of Engineering Drawing: to British and International Standards

Colin H. Simmons, Dennis E. Maguire

Manual of Engineering Drawing: to British and International Standards Colin H. Simmons, Dennis E. Maguire

The Manual of Engineering Drawing has long been recognised as the student and practising engineer's guide to producing engineering drawings that comply with ISO and British Standards. The information in this book is equally applicable to any CAD application or manual drawing. The second edition is fully in line with the requirements of the new British Standard BS8888: 2002, and will help engineers, lecturers and students with the transition to the new standards.

BS8888 is fully based on the relevant ISO standards, so this book is also ideal for an international readership. The comprehensive scope of this book encompasses topics including orthographic, isometric and oblique projections, electric and hydraulic diagrams, welding and adhesive symbols, and guidance on tolerancing.

Written by a member of the ISO committee and a former college lecturer, the Manual of Engineering Drawing combines up-to-the-minute technical accuracy with clear, readable explanations and numerous diagrams. This approach makes this an ideal student text for vocational courses in engineering drawing and undergraduates studying engineering design / product design.

Colin Simmons is a member of the BSI and ISO Draughting Committees and an Engineering Standards Consultant. He was formerly Standards Engineer at Lucas CAV.

- * Fully in line with the latest ISO Standards
- * A textbook and reference guide for students and engineers involved in design engineering and product design
- * Written by a former lecturer and a current member of the relevant standards committees

From reader reviews:

Donald Kelley:

The book untitled Manual of Engineering Drawing: to British and International Standards contain a lot of information on that. The writer explains her idea with easy way. The language is very easy to understand all the people, so do certainly not worry, you can easy to read that. The book was written by famous author. The author brings you in the new era of literary works. It is possible to read this book because you can read on your smart phone, or program, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site and also order it. Have a nice examine.

Frankie Graybill:

As we know that book is vital thing to add our knowledge for everything. By a book we can know everything we really wish for. A book is a group of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This e-book Manual of Engineering Drawing: to British and International Standards was filled regarding science. Spend your spare time to add your knowledge about your scientific research competence. Some people has several feel when they reading any book. If you know how big good thing about a book, you can truly feel enjoy to read a e-book. In the modern era like at this point, many ways to get book which you wanted.

Alva Sexton:

As a student exactly feel bored in order to reading. If their teacher expected them to go to the library as well as to make summary for some e-book, they are complained. Just tiny students that has reading's spirit or real their interest. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that examining is not important, boring and can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore this Manual of Engineering Drawing: to British and International Standards can make you sense more interested to read.

Joseph Nixon:

Reading a publication make you to get more knowledge from this. You can take knowledge and information originating from a book. Book is composed or printed or created from each source which filled update of news. In this modern era like at this point, many ways to get information are available for anyone. From media social including newspaper, magazines, science book, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just seeking the Manual of Engineering Drawing: to British and International Standards when you required it?
