Structured Fluids: Polymers, Colloids, Surfactants

Thomas A. Witten, Philip A. Pincus

Structured Fluids: Polymers, Colloids, Surfactants Thomas A. Witten, Philip A. Pincus

Over the last thirty years, the study of liquids containing polymers, surfactants, or colloidal particles has developed from a loose assembly of facts into a coherent discipline with substantial predictive power. These liquids expand our conception of what condensed matter can do. Such structured-fluid phenomena dominate the physical environment within living cells. This book teaches how to think of these fluids from a unified point of view showing the far-reaching effects of thermal fluctuations in producing forces and motions. Keeping mathematics to a minimum, the book seeks the simplest explanations that account for the distinctive scaling properties of these fluids. An example is the growth of viscosity of a polymer solution as the cube of the molecular weight of the constituent polymers. Another is the hydrodynamic radius of a colloidal aggregate, which remains comparable to its geometrical radius even though the density of particles in the aggregate becomes arbitrarily small. The book aims for a simplicity, unity and depth not found in previous treatments, and includes numerous figures, tables and problems. It will be an ideal textbook for teaching undergraduates in physical science how to understand soft matter, but will also be of interest to industrial scientists, who want to gain a broader understanding of soft matter systems.

From reader reviews:

Ruth Mahan:

In this 21st centuries, people become competitive in every way. By being competitive currently, people have do something to make these survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated it for a while is reading. That's why, by reading a publication your ability to survive raise then having chance to stand up than other is high. For you who want to start reading some sort of book, we give you that Structured Fluids: Polymers, Colloids, Surfactants book as starter and daily reading reserve. Why, because this book is more than just a book.

Denise Dennis:

Do you one of people who can't read pleasurable if the sentence chained inside the straightway, hold on guys that aren't like that. This Structured Fluids: Polymers, Colloids, Surfactants book is readable through you who hate the straight word style. You will find the information here are arrange for enjoyable studying experience without leaving also decrease the knowledge that want to give to you. The writer connected with Structured Fluids: Polymers, Colloids, Surfactants content conveys objective easily to understand by lots of people. The printed and e-book are not different in the articles but it just different in the form of it. So , do you continue to thinking Structured Fluids: Polymers, Colloids, Surfactants is not loveable to be your top checklist reading book?

William Burns:

Reading a e-book tends to be new life style with this era globalization. With reading you can get a lot of information which will give you benefit in your life. Along with book everyone in this world can share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their own reader with their story or even their experience. Not only the story that share in the books. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors nowadays always try to improve their talent in writing, they also doing some investigation before they write on their book. One of them is this Structured Fluids: Polymers, Colloids, Surfactants.

Sophie Clark:

Playing with family inside a park, coming to see the marine world or hanging out with friends is thing that usually you have done when you have spare time, in that case why you don't try thing that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Structured Fluids: Polymers, Colloids, Surfactants, it is possible to enjoy both. It is very good combination right, you still wish to miss it? What kind of hang type is it? Oh can occur its mind hangout guys. What? Still don't understand it, oh come on its named reading friends.
