A Course in Statistics with R Prabhanjan N. Tattar, Suresh Ramaiah, B. G. Manjunath
Integrates the theory and applications of statistics using R *A Course in Statistics with R* has been written to bridge the gap between theory and applications and explain how mathematical expressions are converted into R programs. The book has been primarily designed as a useful companion for a Masters student during each semester of the course, but will also help applied statisticians in revisiting the underpinnings of the subject. With this dual goal in mind, the book begins with R basics and quickly covers visualization and exploratory analysis. Probability and statistical inference, inclusive of classical, nonparametric, and Bayesian schools, is developed with definitions, motivations, mathematical expression and R programs in a way which will help the reader to understand the mathematical development as well as R implementation. Linear regression models, experimental designs, multivariate analysis, and categorical data analysis are treated in a way which makes effective use of visualization techniques and the related statistical techniques underlying them through practical applications, and hence helps the reader to achieve a clear understanding of the associated statistical models.

Key features:

- Integrates R basics with statistical concepts
- Provides graphical presentations inclusive of mathematical expressions
- Aids understanding of limit theorems of probability with and without the simulation approach
- Presents detailed algorithmic development of statistical models from scratch
- Includes practical applications with over 50 data sets

From reader reviews:

Marlene Clabaugh:

The e-book untitled A Course in Statistics with R is the book that recommended to you to learn. You can see the quality of the e-book content that will be shown to a person. The language that publisher use to explained their way of doing something is easily to understand. The copy writer was did a lot of analysis when write the book, so the information that they share to your account is absolutely accurate. You also will get the e-book of A Course in Statistics with R from the publisher to make you much more enjoy free time.

Clarissa Holland:

A Course in Statistics with R can be one of your basic books that are good idea. We all recommend that straight away because this book has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining however delivering the information. The article writer giving his/her effort to put every word into delight arrangement in writing A Course in Statistics with R nevertheless doesn't forget the main level, giving the reader the hottest in addition to based confirm resource information that maybe you can be among it. This great information can certainly drawn you into new stage of crucial contemplating.

Danica Johnson:

In this period of time globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. Typically the book that recommended to you is A Course in Statistics with R this book consist a lot of the information with the condition of this world now. That book was represented so why is the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. The particular writer made some exploration when he makes this book. That's why this book suitable all of you.

Carole Arehart:

Many people spending their period by playing outside together with friends, fun activity along with family or just watching TV the whole day. You can have new activity to enjoy your whole day by reading through a book. Ugh, you think reading a book will surely hard because you have to take the book everywhere? It fine you can have the e-book, delivering everywhere you want in your Mobile phone. Like A Course in Statistics with R which is obtaining the e-book version. So , try out this book? Let's observe.
