Neuropsychopharmacology and Therapeutics

Ivor Ebenezer

Neuropsychopharmacology and Therapeutics Ivor Ebenezer

Neuropsychopharmacology is a relatively new subject area in the neurosciences. It is a field of study that describes the effects of drugs from the molecular to the behavioural level and requires integration and synthesis of knowledge from various disciplines including neuroanatomy, physiology, molecular biology, pharmacology and the behavioural sciences. The principal aims of this book are to provide students with a clear understanding of CNS disorders, and an appreciation of how basic and clinical research findings can be translated into therapeutics.

After an introduction to the subject area, the remaining chapters are focused on reviewing the main psychiatric and neurological disorders that are covered in most courses. They are discussed in terms of their clinical symptoms, epidemiology, pathology, aetiology, underlying neurobiological and neurochemical mechanisms, pharmacotherapy, adjunctive non-pharmacological treatments, and clinical outcomes. Each chapter of the book is a 'stand-alone' chapter and is written in a clear, accessible style.

Written by an author with many years teaching and research experience, this textbook will prove invaluable for students of pharmacology, pharmacy and the medical sciences needing a truly integrated introduction to this exciting field.

Christine Andrews:

Many people spending their time frame by playing outside with friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to pay your whole day by reading through a book. Ugh, think reading a book can definitely hard because you have to take the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Smart phone. Like Neuropsychopharmacology and Therapeutics which is finding the e-book version. So , try out this book? Let's observe.

Hilary Rangel:

As a university student exactly feel bored for you to reading. If their teacher requested them to go to the library or even make summary for some reserve, they are complained. Just tiny students that has reading's heart and soul or real their pastime. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading very seriously. Any students feel that reading is not important, boring as well as can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Neuropsychopharmacology and Therapeutics can make you feel more interested to read.
