## **Liquid Chromatography: Chapter 10. Forensic Toxicology** C. Kostakis, P. Harpas, P. Stockham

Practitioners of forensic toxicology are expected to detect, confirm, and quantify a chemically diverse range of drugs and poisons covering a number of orders of magnitude in concentration in challenging biological matrices. Developments in LC–MS have enabled a wider range of compounds to be analyzed using fewer extraction processes, practically eliminating the requirement for derivatization steps and with fewer instrumental analysis stages. This chapter provides the reader with a broad overview of the current capabilities offered by LC in this branch of analytical chemistry—as well as its limitations.
