Internet Alley: High Technology in Tysons Corner, 1945--2005 (Lemelson Center Studies in Invention and Innovation series) Paul E. Ceruzzi

Much of the world's Internet management and governance takes place in a corridor extending west from Washington, DC, through northern Virginia toward Washington Dulles International Airport. Much of the United States' military planning and analysis takes place here as well. At the center of that corridor is Tysons Corner -- an unincorporated suburban crossroads once dominated by dairy farms and gravel pits. Today, the government contractors and high-tech firms -- companies like DynCorp, CACI, Verisign, and SAIC -- that now populate this corridor have created an "Internet Alley" off the Washington Beltway. In *From Tysons Corner to Internet Alley*, Paul Ceruzzi examines this compact area of intense commercial development and describes its transformation into one of the most dynamic and prosperous regions in the country. Ceruzzi explains how a concentration of military contractors carrying out weapons analysis, systems engineering, operations research, and telecommunications combined with suburban growth patterns to drive the region's development. The dot-com bubble's burst was offset here, he points out, by the government's growing national security-related need for information technology. Ceruzzi looks in detail at the nature of the work carried out by these government contractors and how it can be considered truly innovative in terms of both technology and management. Today in Tysons Corner, clusters of sleek new office buildings housing high-technology companies stand out against the suburban landscape, and the upscale Tysons Galleria Mall is neighbor to a government-owned radio tower marked by a sign warning visitors not to photograph or sketch it. Ceruzzi finds that a variety of perennially relevant issues intersect here, making it both a literal and figurative crossroads: federal support of scientific research, the shift of government activities to private contractors, local politics of land use, and the postwar movement from central cities to suburbs.

From reader reviews:

Jeremy Brown:

The book Internet Alley: High Technology in Tysons Corner, 1945--2005 (Lemelson Center Studies in Invention and Innovation series) can give more knowledge and information about everything you want. So why must we leave the great thing like a book Internet Alley: High Technology in Tysons Corner, 1945--2005 (Lemelson Center Studies in Invention and Innovation series)? Several of you have a different opinion about publication. But one aim in which book can give many facts for us. It is absolutely correct. Right now, try to closer together with your book. Knowledge or info that you take for that, you can give for each other; it is possible to share all of these. Book Internet Alley: High Technology in Tysons Corner, 1945--2005 (Lemelson Center Studies in Invention and Innovation series) has simple shape nevertheless, you know: it has great and massive function for you. You can search the enormous world by start and read a publication. So it is very wonderful.

Shane Ward:

People live in this new morning of lifestyle always attempt to and must have the spare time or they will get lots of stress from both lifestyle and work. So , whenever we ask do people have extra time, we will say absolutely yes. People is human not really a huge robot. Then we request again, what kind of activity have you got when the spare time coming to anyone of course your answer can unlimited right. Then do you try this one, reading guides. It can be your alternative within spending your spare time, the actual book you have read is Internet Alley: High Technology in Tysons Corner, 1945--2005 (Lemelson Center Studies in Invention and Innovation series).

Brian Pena:

Playing with family inside a park, coming to see the sea world or hanging out with friends is thing that usually you might have done when you have spare time, after that why you don't try thing that really opposite from that. 1 activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Internet Alley: High Technology in Tysons Corner, 1945--2005 (Lemelson Center Studies in Invention and Innovation series), you may enjoy both. It is great combination right, you still would like to miss it? What kind of hangout type is it? Oh occur its mind hangout fellas. What? Still don't buy it, oh come on its named reading friends.

James Hopwood:

Reading a e-book make you to get more knowledge as a result. You can take knowledge and information originating from a book. Book is created or printed or descriptive from each source that will filled update of news. Within this modern era like now, many ways to get information are available for a person. From media social like newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just looking for

the Internet Alley: High Technology in Tysons Corner, 1945--2005 (Lemelson Center Studies in Invention and Innovation series) when you required it?
