Evaluating Factors Controlling Damage and Productivity in Tight Gas Reservoirs (Springer Theses)

Nick Bahrami

Tight gas reservoirs have very low permeability and porosity, which cannot be produced at economical flow rates unless the well is efficiently stimulated and completed using advanced and optimized technologies. Economical production on the basis of tight gas reservoirs is challenging in general, not only due to their very low permeability but also to several different forms of formation damage that can occur during drilling, completion, stimulation, and production operations.

This study demonstrates in detail the effects of different well and reservoir static and dynamic parameters that influence damage mechanisms and well productivity in tight gas reservoirs. Geomechanics, petrophysics, production and reservoir engineering expertise for reservoir characterization is combined with a reservoir simulation approach and core analysis experiments to understand the optimum strategy for tight gas development, delivering improved well productivity and gas recovery.

From reader reviews:

Leslie Babcock:

Have you spare time for the day? What do you do when you have a lot more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent their own spare time to take a move, shopping, or went to often the Mall. How about open or even read a book called Evaluating Factors Controlling Damage and Productivity in Tight Gas Reservoirs (Springer Theses)? Maybe it is being best activity for you. You recognize beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with its opinion or you have various other opinion?

Donald Davisson:

What do you about book? It is not important together with you? Or just adding material when you want something to explain what yours problem? How about your spare time? Or are you busy particular person? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have time? What did you do? Everyone has many questions above. They need to answer that question mainly because just their can do which. It said that about publication. Book is familiar in each person. Yes, it is appropriate. Because start from on guardería until university need this specific Evaluating Factors Controlling Damage and Productivity in Tight Gas Reservoirs (Springer Theses) to read.

Mark Malek:

Reading a e-book can be one of a lot of action that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a book will give you a lot of new info. When you read a publication you will get new information due to the fact book is one of a number of ways to share the information or even their idea. Second, looking at a book will make you more imaginative. When you reading a book especially tale fantasy book the author will bring that you imagine the story how the character types do it anything. Third, you could share your knowledge to some others. When you read this Evaluating Factors Controlling Damage and Productivity in Tight Gas Reservoirs (Springer Theses), you can tells your family, friends and soon about yours publication. Your knowledge can inspire different ones, make them reading a guide.

Alyson Ward:

The book untitled Evaluating Factors Controlling Damage and Productivity in Tight Gas Reservoirs (Springer Theses) contain a lot of information on that. The writer explains her idea with easy way. The language is very easy to understand all the people, so do certainly not worry, you can easy to read it. The book was authored by famous author. The author provides you in the new period of time of literary works. You can actually read this book because you can read on your smart phone, or program, so you can read the book throughout anywhere and anytime. If you want to buy the e-book, you can wide open their official web-site in addition to order it. Have a nice go through.
