Statins Toxic Side Effects: Evidence from 500 scientific papers (Cholesterol) David Evans

This book uses evidence from 500 scientific papers that show, incontrovertibly, that statins not only do not improve health but cause actual harm and should be avoided. • The disturbing effects of statins on death rates, heart disease, stroke, diabetes and cancer. • Statins are a health disaster for those with an underactive thyroid. • How statins cause muscle disease, kidney disease, liver disease, pancreatitis and multiorgan failure. • The dire consequences of statin use on the nervous system. • Autoimmune diseases, arthritis and skin infections may result from statin use. • Evidence is presented that reveal statins are deleterious for those that have asthma and lung diseases. • Exercise performance is severely restricted by the use of the drug. • People taking statins are found to have a ‘foggy’ brain, depression and an increased risk of violence and suicidal thoughts. • Statins can damage your eyes and give you headaches. • They can make men impotent, damage sperm quality and cause birth defects. • Bowel problems, urinary tract infections and other general infections are exacerbated with statin use. • Bone structure may be compromised and tendon rupture is more common when using the drug. These 500 studies underline the judgement of the internationally renowned cardiologist, Dr Michel de Lorgeril, who said about statins: “We’ll come to the inevitable conclusion in the end that these drugs are unnecessary and toxic, they must be removed from the market.”

This Statins Toxic Side Effects: Evidence from 500 scientific papers (Cholesterol) is a great reserve for you because the content that is full of information for you who also always deal with world and have to make decision every minute. This kind of book reveals details accurately using great arranged words or we can point out no rambling sentences inside it. So if you are read it hurriedly you can have whole info in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with wonderful delivering sentences. Having Statins Toxic Side Effects: Evidence from 500 scientific papers (Cholesterol) in your hand like finding the world in your arm, info in it is not ridiculous one particular. We can say that no publication that offer you world throughout ten or fifteen second right but this guide already do that. So, this can be a good reading book. Hi Mr. and Mrs. busy do you still doubt this?

Frank Tye:

As a pupil exactly feel bored to reading. If their teacher requested them to go to the library or to make summary for some book, they are complained. Just tiny students that has reading's internal or real their leisure activity. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that reading is not important, boring in addition to can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to

reach Chinese's country. Therefore , this Statins Toxic Side Effects: Evidence from 500 scientific papers (Cholesterol) can make you feel more interested to read.
