# Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials Serie)

*Alexei V. Finkelstein, Oleg Ptitsyn*

## **Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials Serie)** Alexei V. Finkelstein, Oleg Ptitsyn

Protein Physics is a lively presentation of the most general problems of protein structure, folding and function from the physics and chemistry perspective, based on lectures given by the authors. It deals with fibrous, membrane and, most of all, with the best studied water-soluble globular proteins, in both their native and denatured states. The major aspects of protein physics are covered systematically, physico-chemical properties of polypeptide chains; their secondary structures; tertiary structures of proteins and their classification; conformational transitions in protein molecules and their folding; intermediates of protein folding; folding nuclei; physical backgrounds of coding the protein structures by their amino acid sequences and protein functions in relation to the protein structure. The book will be of interest to undergraduate and graduate level students and researchers of biophysics, biochemistry, biology and material science.

- \* Designed for a wide audience of undergraduate and graduate students, as well as being a reference for researchers in academia and industry
- \* Covers the most general problems of protein structure, folding, and function and introduces the key concepts and theories
- \* Deals with fibrous, membrane and especially water-soluble globular proteins, in both their native and denatured states
- \* Summarizes and presents in a systematic form the results of several decades of world wide fundamental research on protein physics, structure and folding
- \* Examines experimental data on protein structure in the post-genome era

### **From reader reviews:**

#### **Travis Freeman:**

Do you certainly one of people who can't read pleasant if the sentence chained inside straightway, hold on guys that aren't like that. This Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials Serie) book is readable simply by you who hate the straight word style. You will find the info here are arrange for enjoyable reading experience without leaving even decrease the knowledge that want to offer to you. The writer connected with Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials Serie) content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the information but it just different by means of it. So , do you nonetheless thinking Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials Serie) is not loveable to be your top listing reading book?

#### **Marco Roy:**

People live in this new time of lifestyle always try and and must have the time or they will get large amount of stress from both daily life and work. So , if we ask do people have extra time, we will say absolutely sure. People is human not just a robot. Then we inquire again, what kind of activity are you experiencing when the spare time coming to an individual of course your answer will certainly unlimited right. Then ever try this one, reading ebooks. It can be your alternative inside spending your spare time, often the book you have read is definitely Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials Serie).

#### **Harley Campbell:**

Are you kind of occupied person, only have 10 or 15 minute in your time to upgrading your mind proficiency or thinking skill even analytical thinking? Then you have problem with the book in comparison with can satisfy your short space of time to read it because this all time you only find reserve that need more time to be examine. Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials Serie) can be your answer since it can be read by an individual who have those short spare time problems.

#### **Danielle Hawkins:**

Don't be worry for anyone who is afraid that this book will probably filled the space in your house, you will get it in e-book approach, more simple and reachable. This particular Protein Physics: A Course of Lectures (Soft Condensed Matter, Complex Fluids and Biomaterials Serie) can give you a lot of buddies because by you taking a look at this one book you have factor that they don't and make you actually more like an interesting person. This specific book can be one of a step for you to get success. This e-book offer you information that possibly your friend doesn't understand, by knowing more than additional make you to be great individuals. So , why hesitate? Let's have Protein Physics: A Course of Lectures (Soft Condensed

Matter, Complex Fluids and Biomaterials Serie).
