3G Evolution: HSPA and LTE for Mobile Broadband

Erik Dahlman, Stefan Parkvall, Johan Skold, Per Beming

3G Evolution: HSPA and LTE for Mobile Broadband Erik Dahlman, Stefan Parkvall, Johan Skold, Per Beming

This very up-to-date and practical book, written by engineers working closely in 3GPP, gives insight into the newest technologies and standards adopted by 3GPP, with detailed explanations of the specific solutions chosen and their implementation in HSPA and LTE.

The key technologies presented include multi-carrier transmission, advanced single-carrier transmission, advanced receivers, OFDM, MIMO and adaptive antenna solutions, advanced radio resource management and protocols, and different radio network architectures. Their role and use in the context of mobile broadband access in general is explained. Both a high-level overview and more detailed step-by-step explanations of HSPA and LTE implementation are given. An overview of other related systems such as TD SCDMA, CDMA2000, and WIMAX is also provided.

This is a 'must-have' resource for engineers and other professionals working with cellular or wireless broadband technologies who need to know how to utilize the new technology to stay ahead of the competition.

The authors of the book all work at Ericsson Research and are deeply involved in 3G development and standardisation since the early days of 3G research. They are leading experts in the field and are today still actively contributing to the standardisation of both HSPA and LTE within 3GPP.

- * Gives the first explanation of the radio access technologies and key international standards for moving to the next stage of 3G evolution: fully operational mobile broadband
- * Describes the new technologies selected by the 3GPP to realise High Speed Packet Access (HSPA) and Long Term Evolution (LTE) for mobile broadband
- * Gives both higher-level overviews and detailed explanations of HSPA and LTE as specified by 3GPP

From reader reviews:

Charity Reulet:

Information is provisions for people to get better life, information presently can get by anyone on everywhere. The information can be a knowledge or any news even a concern. What people must be consider while those information which is inside the former life are challenging to be find than now is taking seriously which one would work to believe or which one the particular resource are convinced. If you find the unstable resource then you have it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take 3G Evolution: HSPA and LTE for Mobile Broadband as the daily resource information.

Cecilia Moore:

This book untitled 3G Evolution: HSPA and LTE for Mobile Broadband to be one of several books which best seller in this year, that's because when you read this publication you can get a lot of benefit onto it. You will easily to buy this book in the book shop or you can order it by way of online. The publisher in this book sells the e-book too. It makes you more easily to read this book, as you can read this book in your Mobile phone. So there is no reason for your requirements to past this book from your list.

Terry Myers:

You are able to spend your free time you just read this book this guide. This 3G Evolution: HSPA and LTE for Mobile Broadband is simple to bring you can read it in the park your car, in the beach, train along with soon. If you did not have got much space to bring the printed book, you can buy often the e-book. It is make you much easier to read it. You can save the particular book in your smart phone. Therefore there are a lot of benefits that you will get when you buy this book.

Herbert Mikula:

Is it you who having spare time subsequently spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This 3G Evolution: HSPA and LTE for Mobile Broadband can be the answer, oh how comes? It's a book you know. You are therefore out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these textbooks have than the others?
