Rhinoceros Giants: The Paleobiology of Indricotheres (Life of the Past) Donald R. Prothero

Written for everyone fascinated by the huge beasts that once roamed the earth, this book introduces the giant hornless rhinoceros, Indricotherium. These massive animals inhabited Asia and Eurasia for more than 14 million years, about 37 to 23 million years ago. They had skulls 6 feet long, stood 22 feet high at the shoulder, and were twice as heavy as the largest elephant ever recorded, tipping the scales at 44,100 pounds. Fortunately, the big brutes were vegetarians. Donald R. Prothero tells their story, from their discovery just a century ago to the latest research on how they lived and died.

Mark Brainerd:

As a scholar exactly feel bored to help reading. If their teacher requested them to go to the library or even make summary for some guide, they are complained. Just tiny students that has reading's internal or real their passion. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading very seriously. Any students feel that studying is not important, boring and also can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore , this Rhinoceros Giants: The Paleobiology of Indricotheres (Life of the Past) can make you feel more interested to read.
