Communication Engineering

M.N. Bandyopadhyay

Communication Engineering M.N. Bandyopadhyay

This compact and student-friendly text offers a comprehensive introduction to several topics of communication engineering, imparting a thorough grounding in the fundamental concepts of modulation and demodulation, radio communication, telecommunication, radar, television, network management in communication, and advances in communication. It explains the basic theory of operation and applications. The main objective of this text is to provide the students with a clear understanding of the principles of communication engineering, aided by several diagrams and solved numerical problems.

DISTINGUISHING FEATURES

- A number of solved examples to reinforce the concepts
- Concepts are explained with block diagrams for better understanding
- Numerous objective type questions (around 400) are provided in the Appendix

The book is primarily addressed to the needs of the undergraduate students of electrical and electronics, electronics and communication engineering and telecommunication engineering.
