CRC Handbook of Fundamental Spectroscopic Correlation Charts

Thomas J. Bruno, Paris D.N. Svoronos

CRC Handbook of Fundamental Spectroscopic Correlation Charts Thomas J. Bruno, Paris D.N. Svoronos

From forensics and security to pharmaceuticals and environmental applications, spectroscopic detection is one of the most cost-effective methods for identifying chemical compounds in a wide range of disciplines. For spectroscopic information, correlation charts are far more easily used than tables, especially for scientists and students whose own areas of specialization may lie elsewhere. The CRC Handbook of Fundamental Spectroscopic Correlation Charts provides a collection of spectroscopic information and unique correlation charts for use in the interpretation of spectroscopic measurements.

The handbook presents useful analysis and assignment of spectra and structural elucidation of organic and organometallic molecules. The correlation charts are compiled from an extensive search of spectroscopic literature and contain current, detailed information that includes new results for many compounds. The handbook includes graphical data charts for nuclear magnetic resonance spectroscopy of the most useful nuclei, as well as infrared and ultraviolet spectrophotometry. Because mass spectrometry data is not best represented graphically, the data are presented in tabular form, where mass spectrometry can be used for analyses and structural determinations in tandem with other techniques. In addition to presenting absorption bands and intensities for a variety of important functional groups and chemical families, the book also discusses instrument calibration, diagnostics, common solvents, fragmentation patterns, several practical conversion tables, and laboratory safety.

Not intended to replace reference works that provide exhaustive spectral charts on specific compound classes, this book fills the need for fundamental charts that are needed on a general, day-to-day basis. The CRC Handbook of Fundamental Spectroscopic Correlation Charts is an ideal laboratory companion for students and professionals in academic, industrial, and government labs.

From reader reviews:

Alice Navarro:

The book CRC Handbook of Fundamental Spectroscopic Correlation Charts give you a sense of feeling enjoy for your spare time. You can utilize to make your capable a lot more increase. Book can for being your best friend when you getting anxiety or having big problem with the subject. If you can make reading through a book CRC Handbook of Fundamental Spectroscopic Correlation Charts to be your habit, you can get considerably more advantages, like add your own capable, increase your knowledge about many or all subjects. It is possible to know everything if you like wide open and read a reserve CRC Handbook of Fundamental Spectroscopic Correlation Charts. Kinds of book are several. It means that, science reserve or encyclopedia or other folks. So , how do you think about this book?

Thomas Gonzalez:

Reading a guide can be one of a lot of action that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people fantastic. First reading a guide will give you a lot of new facts. When you read a e-book you will get new information simply because book is one of numerous ways to share the information or perhaps their idea. Second, looking at a book will make a person more imaginative. When you reading through a book especially hype book the author will bring someone to imagine the story how the figures do it anything. Third, you could share your knowledge to some others. When you read this CRC Handbook of Fundamental Spectroscopic Correlation Charts, you are able to tells your family, friends and soon about yours publication. Your knowledge can inspire different ones, make them reading a publication.

Ralph Wood:

Is it you actually who having spare time and then spend it whole day by watching television programs or just laying on the bed? Do you need something new? This CRC Handbook of Fundamental Spectroscopic Correlation Charts can be the solution, oh how comes? It's a book you know. You are thus out of date, spending your free time by reading in this brand-new era is common not a geek activity. So what these textbooks have than the others?

Luis Poole:

What is your hobby? Have you heard which question when you got scholars? We believe that that query was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. So you know that little person similar to reading or as examining become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to include you knowledge, except your personal teacher or lecturer. You see good news or update concerning something by book. Numerous books that can you take to be your object. One of them is actually CRC Handbook of Fundamental Spectroscopic Correlation Charts.
