Life at the Speed of Light: From the Double Helix to the Dawn of Digital Life

J. Craig Venter

Life at the Speed of Light: From the Double Helix to the Dawn of Digital Life J. Craig Venter
“Venter instills awe for biology as it is, and as it might become in our hands.” —*Publishers Weekly*

On May 20, 2010, headlines around the world announced one of the most extraordinary accomplishments in modern science: the creation of the world’s first synthetic lifeform. In *Life at the Speed of Light*, scientist J. Craig Venter, best known for sequencing the human genome, shares the dramatic account of how he led a team of researchers in this pioneering effort in synthetic genomics—and how that work will have a profound impact on our existence in the years to come. This is a fascinating and authoritative study that provides readers an opportunity to ponder afresh the age-old question “What is life?” at the dawn of a new era of biological engineering.
